

# sustainable building

The development and construction of buildings has become an increasingly complex process, particularly with the introduction of the Code for Sustainable Homes. As a result, both planning consents and the building regulations now require minimum or enhanced building performance or a reduced carbon footprint.

DLP Consulting Group has a dedicated team of professionals who are experienced in dealing with the various issues. The aim of this team is to provide specialist advice on the issues that now affect developments from the initial design stages through to the on-site construction phase.

## Advice

In addition to ensuring that building works conform with current regulations, we can advise on the implications of prospective future standards and the steps that could be taken now to improve performance.

## Integration

We attach considerable weight to the importance of sustainable building and the integration of detailed design and specifications at an early stage. This is the key to improving all aspects of the performance of a building in terms all keys aspects of construction and operational efficiency and to delivering the most effective solutions.

## Compatibility

In conjunction with specialist manufacturers, we can combine high and low tech energy efficiency measures,

sustainable materials and renewable energy applications to meet current and emerging regulatory requirements.

## Innovation

Direct liaison by DLP with both leading manufacturers and design innovation companies allows us to find the best balance between compliance with regulations and budget targets, ensuring that opportunities are captured.

## Approvals

DLP Design Ltd, together with appropriate consultants with whom we have fostered partnerships, will obtain the required regulatory approvals. This will be achieved in close consultation with approved assessors to secure the required or desired outcome.

## Training

To ensure that the latest developments in this ever changing and evolving industry are made available to each project, continual professional development is provided and staff are being trained to meet the required standards.

## Our commitment

Within DLP Design Ltd we recognise our personal responsibility and strive in all cases to minimise our own impact upon the environment.
